

THE WORLD NEEDS YOUR EXPERIENCE

We need your help to review applications for the AiC Awards

Be inspired by the next generation of women, genderqueer, and non-binary technologists!

We receive thousands of award applications each year, and volunteers are a critical part of our review process. Please SHARE this with others!

Choose the award category that meets your interest:

-  **High School Award for aspiring technologists in grades 9-12**
-  **Collegiate Award for outstanding accomplishments of undergraduate and graduate students**
-  **Educator Award for transformative formal and informal educators of students in grades 9-12**
-  **Impact Award for AiC Community members and TECHNOLOchicas who are creating opportunities in computing for their peers**

Who can volunteer?

All individuals who are interested in encouraging aspiring technologists are welcome to volunteer, including eligible AiC Community members! (Note: technical people are particularly encouraged to volunteer to review AiC Collegiate Award applications and must be over 18 years old.)

I've reviewed the Collegiate Award applications for the past two years, and the work some of these students are doing blows my mind! I am amazed at the commitment and curiosity these young women show in their respective fields.
